

DRINKING WATER SYSTEMS

- GREAT FOR YOU & THE ENVIRONMENT

WELCOME TO KINETICO

Water is the very basis of life, touching everyone and everything. Our need for water is fundamental.

Here at Kinetico it is our mission to produce the best possible drinking water solutions for you and your family. We are a recognised leader in drinking water systems, our products are brilliantly designed, easy to use and offer unrivalled reliability.

A Kinetico drinking water system sits out of sight and out of mind, providing you and your family with delicious filtered water, straight from a tap in your kitchen!

*"Bottled water was costing me a fortune! A friend told me about Kinetico. I had one installed, so easy & much cheaper. Can't believe I didn't do it sooner."
- Paul R*

FRESH...

We all know fresh food is vital to our health, to us it makes sense to prepare food with perfectly filtered water.

"It's so nice to have a limescale free kettle at last. The AquaScale has revolutionised my morning coffee. No more horrible scum in the cup."
- KSR, Barnet

WHY DO I NEED FILTERED DRINKING WATER?

Let's start by explaining why you don't want unfiltered drinking water in your home.

- **Slow and clumsy filter jugs**

Filter jugs are clumsy, slow and produce limited quantities of water. Tap mounted filters are unattractive and awkward.

- **Expensive bottled water**

Bottled water can cost up to a staggering 1000 times more than tap water, at a time when household budgets are squeezed this seems like an unnecessarily expensive option!

Then there is the environmental cost. Producing and delivering bottled water creates harmful greenhouse gases, and only a staggering 1 in 4 plastic bottles are recycled, the rest are dumped in landfill sites or left to litter our streets, parks, rivers and beaches.

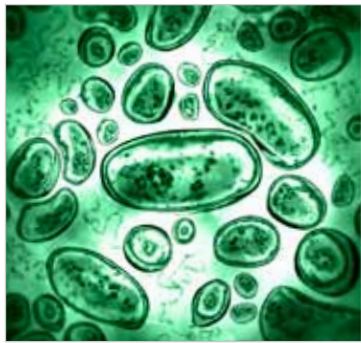

- **Chlorine, bacteria, lead and pesticides**

How many times have you turned your kitchen tap and smelt chlorine? Other contaminants may not be so obvious but can cause greater health problems to you and your family.

- **Limescale**

If you live in a hard water area you have probably noticed a build up of limescale in your kettle. Next time you have a cuppa you may also notice a layer of film forming on the surface, this is also caused by the calcium and magnesium in your water supply.

With a Kinetico drinking water system you can experience freedom from all of these problems, forever!

DID YOU KNOW?

With a Kinetico AquaScale drinking water filter you will have a limescale free kettle and fantastic tasting tea.

"It tastes great and it's nice to know we aren't drinking lots of nasty things like lead that could do us harm."
- Ashwini Bhandari

THE AMAZING BENEFITS

Perfectly filtered water all day, every day...

Enjoy crystal clear drinking water, on tap! All of our drinking water systems are sleek and compact, this means they can be neatly concealed under the kitchen sink. And don't forget they don't need electricity so there won't be any technical problems or increases in your energy bills.

Great tasting food and drink...

With Kinetico filtered drinking water your tea will taste better than ever! Preparing your meals with perfectly filtered water will give you greater peace of mind and enhance the flavours of your favourite meals too.

Good for you and your family...

Reduce the risk of consuming lead, pesticides and other contaminants that may be present in your water. The Kinetico AquaGuard not only produces delicious, ultra-filtered water it also gives an extra level of protection for all the family. With its 1 micron block carbon the filter eliminates sediment, chlorine, pesticides and insecticides, as well as lead and cysts.

Limescale free...

The AquaScale makes drinking water taste great and eradicates the problems caused by limescale.

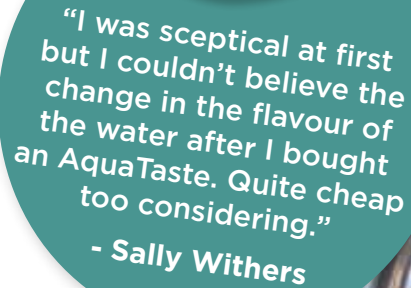

The AquaScale filter reduces the hardness ions, calcium and magnesium, in your water and reduces limescale build-up in your kettle, iron and food steamer, keeping them in pristine condition for longer.

DID YOU KNOW?

There is nothing better than an amazing tasting glass of fresh water. With a Kinetico drinking water system this can be enjoyed straight from the tap!

"I was sceptical at first but I couldn't believe the change in the flavour of the water after I bought an AquaTaste. Quite cheap too considering."
- Sally Withers

SO, HOW DOES IT WORK?

Kinetico's drinking water systems are so easy to use. Some of them even show you when their cartridge needs changing.

All our systems are fitted with a MacGuard™ (Metered Automatic Cartridge) so unfiltered drinking water can't be consumed. This unique device measures the amount of water passing through each filter and stops the flow of water when the filter cartridge is exhausted. They also have a PureMometer® fitted as standard. Our revolutionary filter life indicator, will tell you when your cartridge needs replacing. No fuss, just hassle-free filtered water.*

K5 systems (Pure, Pure +, Pure Ultra)

The Kinetico K5 systems are fitted with three fixed filters a pre-filter, a reverse osmosis membrane filter and a post-filter. The systems also come with a separate QuickFlo water tank to deliver a steady, continuous flow of water from your tap.

K5 Pure + - is also fitted with a Mineral plus filter, adding a measured amount of calcium to your treated drinking water filter.

K5 Pure Ultra - is also fitted with a Purefecta Bacteria filter and a VOC (Volatile Organic Compound) filter, both of which are certified microbiological purifiers.

Aqua Range

AquaTaste - uses a 5 micron granular activated carbon filter to improve the taste and odour of your drinking water.

AquaScale - uses a combination of resin and activated carbon to reduce hardness, chlorine and sediment.

AquaGuard - uses a 1 micron block carbon filter to reduce sediment, chlorine, pesticides, lead and cysts including cryptosporidium.

*The AquaScale is a mixed bed cartridge and as a result does not have a MacGuard™ or a PureMometer®.

Kinetico K5

Kinetico K5

THE PRODUCT RANGE

K5

A revolutionary drinking water system, so advanced it can remove nearly anything from water that isn't water!

Service Flow Rate
4.3 litres per min

Storage Tank
11.3 litre QuickFlo

Dimensions (h x d x w)

K5 Unit
483 mm x 394 mm x 150 mm

QuickFlo Tank
462 mm x 220 mm x 220 mm

Cartridges
Pre-filter
Membrane
Post-filter

up to 10 year guarantee

K5 Pure +

Ideal if you lead an active and healthy lifestyle and want to remove impurities from your tap water, but leave the beneficial minerals.

Service Flow Rate
4.3 litres per min

Storage Tank
11.3 litre QuickFlo

Dimensions (h x d x w)

K5 Unit
483 mm x 394 mm x 150 mm

QuickFlo Tank
462 mm x 220 mm x 220 mm

Cartridges
Pre-filter
Membrane
Mineral Plus
Post-filter

up to 10 year guarantee

K5 Pure Ultra

The ultimate drinking water system so advanced it delivers bio-pure water when safety and security is most important to you and your family.

Service Flow Rate
4.3 litres per min

Storage Tank
11 litre air charge

Dimensions (h x d x w)

K5 Unit
483 mm x 394 mm x 150 mm

Air Charge Tank
410 mm x 250 mm x 250 mm

Cartridges
Pre-filter
VOC Guard
Membrane
Purefecta®
Post-filter

up to 10 year guarantee

All service flow rates are based upon a 50 psi feed.

AquaTaste

Delicious, filtered water on tap! Save a fortune on bottled water, good for you and even better for the environment.

Service Flow Rate
3.75 litres per min

Filters
5 micron granular activated carbon

Removes
Taste
Odour
Chlorine
Sediment

Dimensions
Height 425 mm
Depth 100 mm
Width 155 mm

up to 1 year guarantee
(or 1850 litres)

AquaScale

Keep your kettle in pristine condition with this limescale reducing filter. Your tea will taste fantastic too!

Service Flow Rate
2.73 litres per min

Filters
Combination of resin and activated carbon filter

Removes
Taste
Odour
Hard Minerals (Limescale)
Chlorine

Dimensions
Height 410 mm
Depth 100 mm
Width 155 mm

up to 1 year guarantee
(dependant upon water hardness)
