

Reeds fringe the Wetlands pond, providing a home for insects and other creatures.

The Wetlands provide a haven for water birds. Kereru feast on tree lucerne planted on its edges.

Exploring the wonders of the wetland.

Students searching the Wetlands for water creatures.

The Wetlands are integral to the LEOTC education programme. Students find creatures such as tadpoles, dragonfly larvae and water boatmen in the pond.

Bushy Park

Homestead & Sanctuary

Bushy Park Trust

of Wanganui North

Need your help

Rotary

The Bushy Park Homestead, native forest and its bird life is one of Wanganui's hidden gems.

Bushy Park Trust and the Rotary Club of Wanganui North have formed a partnership to upgrade and extend the facilities around the Wetlands pond below the homestead.

Not only are the Bushy Park Wetlands a "must do" when walking the park's many tracks, but the Wetlands are integral to the LEOTC education programme.

The Bushy Park Education Group has established a self-guided programme for primary schools to follow with the emphasis on enhancing the unique benefits of the Bushy Park Sanctuary.

Already the track from the homestead down to the Wetlands has been upgraded and resurfaced, and a new track has been formed through the bush, around the northern side of the pond.

The next step is to build a wooden raised boardwalk through the pond area. This will give the visiting public an uninterrupted view of this beautiful tranquil area surrounded with it's native bush landscape reflecting on the water. The boardwalk will allow the ever increasing, visiting school groups, to easily observe the many water creatures and bird life.

The 60 metre long boardwalk will be built with Rotary assistance, to a high standard and requires substantial funding.

300
sponsored planks will
fully fund the Wetland
Boardwalk.

We need your help to
achieve this.

Buy a Boardwalk Plank,
engraved with your
name, business or
company name for
only \$55.
