

Environmental Policy

Environmental issues are an integral component of Senis AG corporate policy. In addition to the goal of customer satisfaction, optimum quality and protection of employees from accidents, we see the preservation of the environment as one of our main tasks and fully aware of our responsibilities to the environment.

Senis AG establishes technically and economically viable objectives to optimize the environmental performance of the organization's products, services and activities:

- Constant education and training of all employees in raising the level of awareness about the importance of environmental protection;
- Product development objectives include evaluating the environmental impact over the total life cycle of a product, taking steps toward more efficient use of materials, including packaging; reducing or eliminating hazardous substances; reducing energy consumption; and contributing to improving recycling and disposal;
- Manufacturing objectives include environmentally related aspects of Senis AG activities such as emissions into air and water; use of energy and water; and waste disposal while preventing pollution within our community;
- Senis AG is committed to complying with all applicable laws and regulations, and will promote international harmonization of applicable legislation and regulations along with good industrial practice;
- Efficient external communication with customers, suppliers, authorities and employees for the purpose of continuous improvement of our environmental performance.
