Maternal Index	34.41	68.50	86.67	117.06	150.85	184.64	215.03	233.20	267.29

The **Sandyknowe Suffolk flock** established in 1957 now consists of over 150 ewes and in January 2000 was transferred to Messrs. Malcolm M. Stewart, Brotherstone.

The flock has been performance recorded for 47 years.

More recently, MLC ultrasonic scanning services have been used for selection within the flock. The ewes are lambed in April, and are managed on a commercial basis.

---

### LAMB VIGOUR

**All ewes other than triplets are lambed outside, with any ewes not successfully rearing lambs being culled and therefore ensuring only sheep with high lamb vigour are bred from.**

---
