VENDORS + PURCHASERS

Vendors are recommended to inspect birds for signs of ill health or welfare problems before travelling to the sale.

All birds will be inspected for signs of ill health or welfare problems by a poultry expert on arrival at the Strathmore Hall. The Hall will be open from 4.30pm.

All vendors and purchasers are asked to wear suitable footwear to adhere to biosecurity measures in place. Disinfectant footbaths will be in place.

All cages, crates, baskets or other containers used for transporting birds must not be visibly contaminated with bird droppings, bedding or other material of bird origin other than that from, or provided for, the birds brought to the sale

Purchasers are recommended to isolate birds travelling from the sale from other birds at that premises and monitor them for signs of illness for at least one week.

Vendors and purchasers are recommended to read the biosecurity information for all bird keepers on pages 13-15 of this catalogue.

CONDITIONS OF SALE

1. Buyer's commission of 10% will be added to each lot + VAT @ 20% on commission only
2. Lots (as per cage) will be sold in catalogue order commencing with birds at 6.00pm
3. Reserve prices – All reserve prices will be adhered to and any lots failing to reach the reserve price will be passed as unsold
An upset price of £5.00 will apply to each lot (eggs £1.00). If the upset price is not reached the auctioneer will pass on to the next lot
4. Vendors are asked before leaving the premises please check with the office that all their entries are sold
5. All lots must be cleared from the market premises, 1 hour after conclusion of sale. Purchasers may not remove any lots without a pass. Vendors with unsold lots must also produce a pass which is obtainable from the office
6. Auctioneers or their staff shall not be in anyway responsible for any loss or damage caused prior to, during or after the sale
7. At the fall of the hammer the lot becomes sole responsibility of the successful bidder
8. All bidders should satisfy themselves to what it is they are buying. Forfar Mart holds no responsibility for any description given or birds being caged in wrong order
9. All Black rocks will be sold as crosses unless the appropriate paperwork is provided to prove otherwise
10. All Discrepancies to be notified to the Office before leaving the premises
11. All items subject to arrival

NOTES

**Notifiable
Avian Diseases**

**Biosecurity
information for all
bird keepers**

This document provides guidance for people who care for **any type of captive bird**, in reducing the risk of introducing or spreading avian disease.

Key Biosecurity Practices

- Buy healthy stock from reliable sources
- Provide clean food and water that is protected from wild birds
- Minimise flock contact with wild birds and in particular, waterfowl
- Maintain good standards of hygiene and use disinfection facilities
- Separate and isolate new or ill stock
- Follow codes* for appropriate slurry management and disposal of litter and other waste
- Record details of stock (eg health and identification), visitors and deliveries
- Develop a contingency plan
- Educate staff on the clinical signs of disease and actions taken on suspicion
- Minimise the risk of people or equipment transferring disease to or from your flock

* Please refer to Page 3 for links to the codes, useful contacts and further information

Register your flock!

It is a **legal requirement** to register your flock if you have 50 or more birds (of any variety). Voluntary registration of smaller flocks is also encouraged.

www.gov.uk/poultry-registration

Notifiable avian diseases

Newcastle disease is a highly contagious disease of wild and captive birds. It can cause a short-term eye infection in humans.

In birds, the main clinical signs are:

- respiratory distress such as gaping beak, coughing, sneezing or gurgling
- muscular tremors
- yellowish-green watery faeces (diarrhoea)
- depression and loss of appetite.

You can **vaccinate your birds** against Newcastle disease; ask your vet for advice.

Avian influenza (bird flu) is a highly contagious disease of birds that can also affect humans and other mammals.

Typically, low pathogenic avian influenza (LPAI) is less severe and may cause mild breathing problems in birds, but those affected may not present clear signs of infection.

Highly pathogenic avian influenza (HPAI) can develop suddenly and with high mortality. Other clinical signs include:

- swollen head
- blue discoloration of neck and throat
- loss of appetite and increased mortality
- respiratory distress such as gaping beak, coughing, sneezing or gurgling
- diarrhoea
- drop in egg production.

However, some bird species (such as ducks, geese and pigeons) display few or no clinical signs.

More information on notifiable avian diseases is available at www.gov.scot

Plan ahead

Assess the risks

The **Codes of Recommendations for the Welfare of Livestock: Animal Health and Biosecurity** (see page 3) can help you identify and reduce risk of your birds becoming infected with a notifiable avian disease.

Consult your vet and prepare a contingency plan to better prepare you for any increase in the risk of disease.

Check that you have provided sufficient Personal Protective Equipment (PPE) to protect staff, should AI be confirmed at your premises.
<http://www.hse.gov.uk/biosafety/diseases/aisuspected.pdf>

Things to think about

To halt the spread of disease, the Scottish Government may implement restrictions on the movement of birds and bird products.

The **GB Notifiable Avian Disease Control Strategy** (see page 3) provides details on the types of restrictions and zones that may be put in place.

Movement restrictions of livestock or produce may be imposed in your area.

- ▶ What would the consequences be for your business?
- ▶ Do you have contingencies and plans to cope with restrictions?

Housing of birds or isolation from wild birds may be required or recommended.

- ▶ Do you have the facilities to accommodate this?
- ▶ If not, what are your options or next steps?

Respond

If notifiable avian disease is confirmed in the UK, you should consider taking additional steps to protect your flock.

Below are some suggestions:

- **Update your contact list** – key people should be easily contactable.
- **Heighten vigilance** – increase the frequency of flock inspections.
- **Increase level of biosecurity** – consider restricting access, and increase facilities for cleansing and disinfection.
- **Listen for news** – updates will be available on the Scottish Government website and shared via radio, news channels and social media.
- **Register for APHA Alerts service** – receive updates directly to your mobile phone or landline.
- **Check your preparedness** – are you ready to engage your contingency plans, should you be affected by movement restrictions?

If you believe that your flock may have any form of notifiable disease you must contact your local APHA Office immediately. Failure to do so can be deemed an offence.
