

# Lawrie & Symington Ltd

Lanark Agricultural Centre

## Sale of Poultry, Waterfowl and Pigs etc.

Thursday 30<sup>th</sup> November  
2017

Ringstock

at 10.30 a.m.

General Hall

at 11.00 a.m

# Lanark Agricultural Centre Sale of Poultry and Waterfowl

## Special Conditions of Sale

The Sale will be conducted subject to the Conditions of Sale of Lawrie and Symington Ltd as approved by the Institute of Auctioneers and Appraisers in Scotland which will be on display in the Auctioneer's office on the day of sale. In addition the following conditions apply.

1. No animal may be sold privately prior to the sale, but must be offered for sale through the ring.
2. Animals which fail to reach the price fixed by the vendor may be sold by Private Treaty after the Auction. All such sales must be passed through the Auctioneers and will be subject to full commission. Reserve Prices should be given in writing to the auctioneer prior to the commencement of the sale.
3. All stock must be numbered and penned in accordance with the catalogued number on arrival at the market.
4. All entries offered for sale must be pre-entered in writing and paid for in full with the entries being allocated on a first come first served basis by the closing date or at 324 2x2 Cages and/or at 70 3x3 Cages, whichever is earliest.
5. No substitutes to entries will be accepted 10 days prior to the date of sale. Any substitutes brought on the sale day **WILL NOT BE OFFERED FOR SALE.**
6. No unbooked entries will be accepted on the day of sale.
7. All purchasers please note that there is a 5% buyer's commission on all lots bought on the day.
8. Anybody wishing to bid on or purchase any lots must first purchase a bidders number for £2 at the main office.
9. All Waterfowl **must have water** provided by vendor

## **Consumer and Trading Standards**

### **The Transport of Animals (Cleansing and Disinfection) (Scotland) Regulations 2005.**

The above Regulations came into force on the 27<sup>th</sup> of January 2006.

Animals to be transported:-

- Hoofed animals
- Domestic fowl, turkeys, geese, ducks, guinea fowls, quails, pigeons, pheasants, partridges and ratites.
- Racing Pigeons

The Regulations require that any bird purchased from a sale at a market can only be transported in a container that has been cleansed and disinfected before the animal or bird is loaded onto it.

It also means that any carrying container should be of a type that can be cleansed and disinfected so a cardboard box would not be suitable for this purpose.

All cleansing and disinfection must be carried out so as to reduce the risk of disease transmission by transporting.

Failing to comply with this requirement is an offence under the Regulations. Any person found guilty of an offence under these Regulations shall be liable of a fine up to £5000.

For further advice please contact the  
Animal Health and Welfare Officer on 01698 455696

250 Shamo Laying Hens & Cockerel  
251 Trio Rhode Island Red Laying Hens  
252 Trio Rhode Island Red Laying Hens

**Notifiable  
Avian Diseases**

# Biosecurity information for all bird keepers

This document provides guidance for people who care for **any type of captive bird**, in reducing the risk of introducing or spreading avian disease.

## Key Biosecurity Practices

- Buy healthy stock from reliable sources
- Provide clean food and water that is protected from wild birds
- Minimise flock contact with wild birds and in particular, waterfowl
- Maintain good standards of hygiene and use disinfection facilities
- Separate and isolate new or ill stock
- Follow codes\* for appropriate slurry management and disposal of litter and other waste
- Record details of stock (eg health and identification), visitors and deliveries
- Develop a contingency plan
- Educate staff on the clinical signs of disease and actions taken on suspicion
- Minimise the risk of people or equipment transferring disease to or from your flock

\* Please refer to Page 3 for links to the codes, useful contacts and further information

## Register your flock!

It is a **legal requirement** to register your flock if you have 50 or more birds (of any variety). Voluntary registration of smaller flocks is also encouraged.

[www.gov.uk/poultry-registration](http://www.gov.uk/poultry-registration)

# Notes

**We Would like to Wish All Our Customers a Merry  
Christmas and a Happy New Year**

## Notes

## Notifiable avian diseases

**Newcastle disease** is a highly contagious disease of wild and captive birds. It can cause a short-term eye infection in humans.

In birds, the main clinical signs are:

- respiratory distress such as gaping beak, coughing, sneezing or gurgling
- muscular tremors
- yellowish-green watery faeces (diarrhoea)
- depression and loss of appetite.

You can **vaccinate your birds** against Newcastle disease; ask your vet for advice.

**Avian influenza (bird flu)** is a highly contagious disease of birds that can also affect humans and other mammals.

Typically, low pathogenic avian influenza (LPAI) is less severe and may cause mild breathing problems in birds, but those affected may not present clear signs of infection.

Highly pathogenic avian influenza (HPAI) can develop suddenly and with high mortality. Other clinical signs include:

- swollen head
- blue discoloration of neck and throat
- loss of appetite and increased mortality
- respiratory distress such as gaping beak, coughing, sneezing or gurgling
- diarrhoea
- drop in egg production.

However, some bird species (such as ducks, geese and pigeons) display few or no clinical signs.

**More information on notifiable avian diseases is available at [www.gov.scot](http://www.gov.scot)**

## Plan ahead

### Assess the risks

The **Codes of Recommendations for the Welfare of Livestock: Animal Health and Biosecurity** (see page 3) can help you identify and reduce risk of your birds becoming infected with a notifiable avian disease.

Consult your vet and prepare a contingency plan to better prepare you for any increase in the risk of disease.

Check that you have provided sufficient Personal Protective Equipment (PPE) to protect staff, should AI be confirmed at your premises.

<http://www.hse.gov.uk/biosafety/diseases/aisuspected.pdf>

### Things to think about

To halt the spread of disease, the Scottish Government may implement restrictions on the movement of birds and bird products.

The **GB Notifiable Avian Disease Control Strategy** (see page 3) provides details on the types of restrictions and zones that may be put in place.

### Movement restrictions of livestock or produce may be imposed in your area.

- ▶ What would the consequences be for your business?
- ▶ Do you have contingencies and plans to cope with restrictions?

### Housing of birds or isolation from wild birds may be required or recommended.

- ▶ Do you have the facilities to accommodate this?
- ▶ If not, what are your options or next steps?

## Respond

If notifiable avian disease is confirmed in the UK, you should consider taking additional steps to protect your flock.

Below are some suggestions:

- **Update your contact list** – key people should be easily contactable.
- **Heighten vigilance** – increase the frequency of flock inspections.
- **Increase level of biosecurity** – consider restricting access, and increase facilities for cleansing and disinfection.
- **Listen for news** – updates will be available on the Scottish Government website and shared via radio, news channels and social media.
- **Register for APHA Alerts service** – receive updates directly to your mobile phone or landline.
- **Check your preparedness** – are you ready to engage your contingency plans, should you be affected by movement restrictions?

**If you believe that your flock may have any form of notifiable disease you must contact your local APHA Office immediately. Failure to do so can be deemed an offence.**
