

Modular Tank System 1000L+

1000L+ Modular Tanks

- Unlimited holding capacity, each tank module connected adds 1,000L towards your required volume.

Slimline

- By far the most slimline available at 750mm wide & 2100mm high.

Easy Install

- Any configuration, easy bolt together tank modules that allow for movement

Outlets

- Can accept 2x 100mm overflow pipes, 1x 25mm tap outlets.

Lid Options

- Standard 320mm or 420mm diameter.
- No Lid or inlet cutting out needed
- All lids are designed to breathe to allow equalising air pressure in each tank module.

Safety

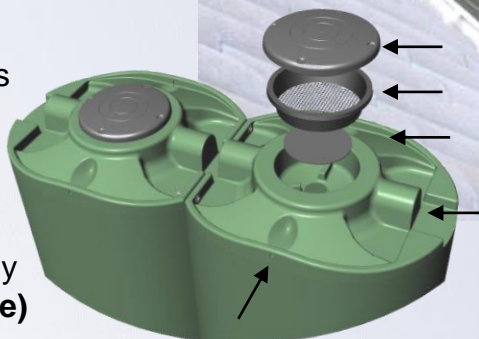

- Earthquake fixing holes provided.

Uneven Surface Proof

- 32mm connection pipes and seals allow for movement and uneven foundation surfaces.

Pump Options

- Add pump & moulded cover to any configuration (see following page)

Designed and manufactured in New Zealand

Pump Module

Complete Assembly

- Pump comes ready plumbed to 25mm tap outlet installed in moulded pump cover.
- Pump fits in under tank base which ensures the most slim and unobtrusive pump console on the market.

After market additions

- Add Pump console and additional 1000L tank modules at any time.
- No specialist tools or skills required.
- Assemble any combination to fit your requirements.
