**DESCRIPTION**

The 3MTS is an easy-to-use handheld Teslameter/Gaussmeter to measure all 3 magnetic field components simultaneously within a very small a volume. It comes in two different versions.

In the 3MTS-1 the 3-axis Hall probe is mounted in a thin but robust carbon-fiber holder attached to the electronic control module.

In the 3MTS-2 the small 3-axis hall probe is connected with a flexible cable to the electronic control module. This is ideal for measuring fields in difficult to access places.

The integrated on-chip temperature sensor allows to generate a temperature compensated measurement output.

The 3MTS is connected with an USB cable to a PC or tablet for control, data acquisition and data visualization. All three components and the total value of the magnetic field as well as the probe temperature are displayed by the 3MTS software graphically. The easy to use software supports export of the measured data and includes alarm triggers and min/max hold functions.

The 3MTS has been developed by Senis in cooperation with its partner company Matesy.

**KEY FEATURES**

- Handheld Teslameter/Gaussmeter with 3-axis Hall probe
- Compact, light and robust packaging
- 3MTS-1: Carbon-fiber probe holder for high robustness and flexibility
- 3MTS-2-Xm: Ceramic probe connected by a thin cable
- Hall probe thickness, including holder: 1 mm
- Measurement ranges: 100 mT, 500 mT, 3 T and 20 T
- Calibration certificate for 100 mT and 500 mT included
- Accuracy: better than ±1.0 % of full range
- Frequency bandwidth: DC to 500 Hz
- AD Conversion: 12 bit
- Computer Interface: USB2, USB3
- User-friendly software for Windows
- Numerical and graphical visualization of all three components of the magnetic field, B_x, B_y and B_z as well as B_{TOTAL}, B_{MAX}, B_{MIN} and probe temperature
- Alarm, MIN/MAX Hold and Zeroing functionality
- Data export to CSV / Excel
- Application programming interface (API) for integration in 3rd party software

### Electrical properties

- AD Conversion: 12 bit
- Sampling frequency: 1 kHz
- Frequency bandwidth: DC to 0.5 kHz
- Operation temperature: (-20 to +85) °C
- Operation temperature ceramic probe and cable (3MTS-2): (-20 to +160) °C

### General properties

- Product Versions
  - 3MTS-1: Probe integrated in carbon probe holder
  - 3MTS-2-X: Ceramic probe connected with cable (X: length of cable in m)
- Weight: 20 g (3MTS-1)
- Dimensions (LxWxH)
  - 3MTS-1: (162 x 22.5 x 10.5) mm
  - Electronic box: (62 x 22.5 x 10.5) mm
- Scope of delivery
  - 3MTS USB-Cable
  - Memory stick with software, API, manuals
  - Plastic carrying case
- Computer requirements
  - Microsoft Windows 7, 10
  - Compatible with USB 2.0 or 3.0

3MTS TESLAMETER
3-Axis USB Handheld Teslameter

a) Graphical visualization of the measured data (Bx, By, Bz, BTOTAL, T); b) Numerical presentation of the measured data (Bx, By, Bz, Btotal, T), Hold MAX/MIN and alarm function; c) Setup tab and data output

Figure 8:

Typical Applications

- Quality control and monitoring of permanent magnets & magnet systems
- Measurement of the environmental magnetic field
- Development of magnet systems & process control
- Magnetic field mapping
- Applications in production lines and laboratories
