WHISLING YOU A WONDERFUL HOLIDAY SEASON
AND A HAPPY NEW YEAR 2015

SINENS

OLYMPTRONIC SOCIAL MEDIA

We launched a project to enhance and improve our social media presence to get even closer to our fans and stay more in touch with our brand's audience.

The project was done in cooperation with the students of Eastman University's Applied Communications Bachelor's program as part of their final term requirements. Our objective was to engage with our audience, and to increase our social media profile.

The project resulted in 7 new successful social media accounts on Facebook, Twitter, Pinterest, Google+, Youtube, LinkedIn, and Instagram.

The main social media platforms

SMITS USB HANDHELD TESLAMETER

The SMITS TESLAMETER is a handheld device that allows measurement of magnetic fields from sources such as power lines and transformers.

Key Features:
- Multi-axis sensor.
- High spatial resolution.
- Measurement accuracy of ±5%.
- Automatic calibration.
- USB connection.
- OLED display.
- Data logging.
- Built-in data logger.
- User-friendly software.
